

Grading Rubric

Final App Ideas:

- 1 Implement Core Data so that you have at least two entities linked together by a Core Data relationship.
- 1 Implement at least two UIViewController subclasses.
- 1 Include a UITableView that displays the data persisted in Core Data.
- 1 Add data to the database from an interface.

Additional items

The way you have your segues setup in your Storyboard, each time you tap a button, it'll create a new View Controller.

Be careful when adding rows of buttons as they're hard to distinguish from one another.

To get inspiration on UI design, checkout <https://pttrns.com>

Add button doesn't seem to add the object to the database, nor dismisses the second view.

Grade: 90
